Languages

Full-stack developer and AI engineer at Cohabs, turning complex systems into useful products, from interfaces and APIs to production AI infrastructure. Engineering degree and business background help me move from an ambiguous need to a system people can rely on. Founded and lead the Cohabs AI Lab, serving 100+ employees with secure access to multiple LLM providers and internal knowledge. Experienced in enterprise software, founder-led SaaS products and focused client delivery.

Experience

Cohabs

Brussels

Full-Stack Developer & AI Engineer

2025 to now

• Founded and lead the Cohabs AI Lab, a secure internal hub giving 100+ employees access to multiple LLM providers and internal knowledge.

• Architected multi-cloud AI infrastructure with Mastra across AWS, Azure and GCP, with high availability and EU data residency.

• Designed retrieval-augmented generation (RAG) pipelines making internal knowledge easier for operations teams to find.

• Built enterprise back-office and public web/mobile products in an Nx monorepo with React, Next.js and React Native.

• Engineered Express APIs for production AI services and internal logistics.

ENGIE

Brussels

Full-Stack Developer

May 2023 to 2025

• Full-stack development on WattsHub, an enterprise monitoring tool supervising operational energy systems, with React front-end and .NET services.

• Delivered features and optimizations for clearer supervision workflows and stronger product reliability.

• Collaborated with cross-functional teams on maintainable integrations with the wider system and improved performance.

Degass (Self-Employment)

2020 to 2024

Founder & Developer

• Founded and built a SaaS platform for managing events in higher-education clubs and associations, built with Symfony.

• Modeled real organizational roles and permissions, registrations, transport options, QR-code confirmations, and event and sales reporting.

• Owned the full product lifecycle: design, development, deployment, infrastructure and ongoing support.

Thales DMS

Oct. 2021 to May 2023

Project Manager & Full-Stack Developer

• Initially an intern, then a fixed-term contract as a project manager and developer, created a PHP (Symfony) tool to enhance the productivity of Customer Service & Support teams.

• Coordinated development efforts and oversaw feature implementation, ensuring timely delivery and quality standards.

Certifications

CCNA 1 & 2
2018
CISCO

TOEIC B2
2020
ETS

- Actively contributed to development, streamlining operational efficiency and user satisfaction.

Iole Solutions **June to Sept. 2021**

Web Developer

- Internship role focused on developing modules for an ERP system based on a proprietary PHP and TypeScript framework.
- Worked closely with the development team to identify and implement functional improvements.
- Involved in client requirement analysis and the deployment of customized solutions.

Jungle Agency **June to Sept. 2019**

Web Developer

- Internship role in web development, specializing in WordPress and Shopify site development.
- Responsible for WordPress site production, troubleshooting, and enhancements.
- Gained practical experience in SEO and online advertising (Meta Business, Google Ads, etc.).
- Addressed and resolved technical issues, enhancing site performance and user engagement.

Projects

Logistics Operations Platform (Client) 2023
Custom Symphony platform built around a logistics company's real processes: missions, deliveries, stock, documents, planning, driver views, appointments and automatic invoicing in one interface.

ISEN Student Union Apparel Store (Client) 2022 - 2023
Shopify storefront for a limited apparel release: visual direction, implementation and payment flow via Stripe, PayPal and Apple Pay.

Education

Rennes School of Business (RSB) Master
IT Business Management 2021 - 2022

- A comprehensive program focusing on the intersection of information technology and business management.
- Covered key topics such as strategic IT planning, project management, data analysis, and digital transformation strategies.

Institut Supérieur de l'Électronique et du Numérique (ISEN)
Engineering Degree 2017 - 2022

- Specialized in software engineering and digital technologies.
- Emphasis on hands-on experience in software development, system design, and emerging technologies.
- Participated in various projects and workshops to apply theoretical knowledge in practical scenarios.
